

# zero waste

## OUR PLAN

At UL, we believe that waste of all kinds is a bad thing. We are taking a stand against waste by implementing a **single stream recycling** process, which diverts recyclable material from the landfill, which in turn reduces the solid waste stream.

## PROGRESS

## GOAL

Our goal is to reach Zero Waste, a philosophy not just about recycling, but about reducing our waste stream altogether.

A shift to Zero Waste will require some changes and some effort from us all, but we know it's the right thing to do for our University, our community, and our environment.

## HOW CAN YOU HELP?

## Make sustainable choices!

### Eliminate excess purchases

Consider your purchases before contributing more material to the holistic stream.

### S.W.A.P. Shop—Surplus With A Purpose

Come by if you have excess or unusable supplies in your office. See what you can trade with other University employees!

### Single Stream Recycling

With UL's Single Stream Recycling, all recyclables can go into the same bin for collection. These recyclables include various papers, plastics, glass, and cardboard.

### Toner Cartridge Recycling

Recycle empty toner cartridges by contacting the Office of Sustainability. We will pick up and recycle your cartridges for you!

### B.Y.O.C.— bring your own container

Use your own washable containers to carry food, drinks, and purchases.

### Stop using plastic bags

Plastic bags cannot be processed in single-stream recycling. Instead, use paper bags or reusable bags.
